

Evidence markers

These numbered signs for use at crime or accident scenes indicate the location of relevant evidence, which is of benefit to those working on the scene at the time, as well as for documenting evidence using photography.

Unlike traditional plastic, these stainless steel markers have enough weight to stay in position even in adverse conditions. Numbers are matte to avoid reflections, and are shown on both outer faces. The A-frame form allows for nested storage. Rounded edges and a soft bend ensure easy and safe handling, and prevent damage to evidence and to forensic PPE of those on the scene.

Each face is 50mm x 50mm. Total height of each marker is 45mm, width at the base is 53mm.

Markers are packed in individual plastic pockets for protection during storage and transportation.

Available with black or red numbers, 10 markers per pack as shown below.

Please enquire for different pack sizes, if more numbers are required.

Black 1-10

Pack of 10

Code: 06-0024

£20.00 + VAT

Red 1-10

Pack of 10

Code: 06-0025

£20.00 + VAT
