

## Fingerprint/Crime Scene Brush (Squirrel Hair)

Since stiff hairs can damage papillary ridges, these brushes are made from a type of very soft hairs, commonly known as squirrel hair. They can be used with any non-magnetic powder, of any colour.

Each brush is supplied in a clear plastic tube to assist storage and avoid damage to bristles.

175mm total length including handle, 50mm brush length.

**Code: 06-0018**

**£18.50 + VAT**

### Fingerprint/Crime Scene Brush (Marabou Feather)

This brush has white feathers, which work particularly well when dusting with fluorescent powders, although work with standard powders as well. The soft feathers prevent damage to even fragile prints.

Each brush is supplied in a clear plastic tube to assist storage and avoid damage to feathers.

190mm total length including handle, 60mm brush length.

**Code: 06-0020      £18.50 + VAT**

### Fingerprint/Crime Scene Brush (Fibreglass)

This brush is designed to spin, twirl and evenly sweep fingerprint powder over the desired surface. The grooved plastic handle allows the user to have a good grip on the brush for this technique. Glass fibres provide softness to prevent damage to prints, and also hold the correct amount of powder to distribute evenly, resulting in fewer trips to the powder jar and less waste. Suitable for use with standard powders or any colour, although it is recommended that a separate brush is used for each colour of powder.

Each brush is supplied in a clear plastic tube to assist storage and avoid damage to fibres.

165mm total length including handle, 50mm brush length.

**Code: 06-0021      £17.50 + VAT**
